

Rapier®

Extruded fire hose

NEW & IMPROVED!

12
MONTH
WARRANTY

Rapier has had an upgrade. Woven with state-of-the-art Loomex™ technology, **Rapier** has a fused thermoplastic polyurethane lining, creating an inseparable bond with the textile reinforcement. This Type 3 fire hose is extruded with a PVC/Nitrile rubber blend cover, which protects it against abrasion damage and makes it easy to wipe clean of oils, stains, and dirt. It is a popular choice for both fire brigades and industrial plant protection.

The hose is available in standard red colour, with yellow and blue options to help distinguish between fire hose (red) and wash-down hose (blue) on the same industrial site. **Rapier** requires no drying and is easy to store. It has Australian Standard AS 2792 approval.

Crusader Hose offers a wide range of couplings securely fitted to the hose. A test certificate can be provided if required. This allows you to confidently protect life and property with a fully approved and tested fire hose.

FEATURES

- ✓ Abrasion resistant
- ✓ High working pressure 2100 kPa
- ✓ Easy to clean
- ✓ Synthetic - no drying
- ✓ Available in red, blue & yellow
- ✓ Australian Made
